**Subject:** OXY OU3 GW Sample Data Packages

Mike,

As you may know, the the aquifer that is impacted with contaminants dowgradient of the Bayer-OXY Hooker RUCO Polymers NPL site is part of the regional groundwater plume from the Northrop Grumman and Naval Weapons Industrial Reserve Plant (NWIRP) Sites. As part of the ongoing mission to evaluate impacts to groundwater, the NYSDEC is requesting the full groundwater sampling data packages from the OXY OU3 Hooker RUCO Groundwater sampling program. Specifically we are requesting electronic copies of the actual laboratory assay reports that contain the full groundwater sampling results packages for the past 24 months by the lab for OXY wells both on and off site.

If you have any questions prior to supplying this information, please contact me direct at any time.

Thanks,

Steve
